INTERESTS	<p>Healthy Aging: We urgently need solutions to address the significant burden of chronic diseases prevalent in late life, especially Alzheimer’s Disease and Related Disorders (ADRD). My research explores disease and resilience etologies using epidemiologic and multi-omic approaches.</p> <p>Encoded Beliefs in Epidemiologic Design: I hope to train the next generation of public health leaders and researchers to identify and critically examine beliefs and philosophical theories encoded in epidemiologic design in order to improve public health practice.</p> <p>Patient-Centered Technology: As an entrepreneur, I co-developed eHealth tools designed to connect, educate, and empower patients, primarily in the field of kidney disease. I hope to leverage research on resilience to produce new tools that improve health.</p>
